

High power LED full-color flashlight

Lighting frame dimensions (燈具尺寸示意圖):

Characteristic:

- ◆ 5 kinds of appearance colors: Black / silver / red / gold / gray.
- ◆ Have the patent rights of Taiwan, mainland, Japan, Germany, U.S.A..
- ◆ And change color automatically, gradation zone, fast with the slow speed way of glimmering.
- ◆ The high light, small, low power consumption of caloric value, can send out 250lm light beam.
- ◆ Possess 10 kinds of colors at the same time: White, red, green, blue, tangerine, light green, purple, yellow, light blue, pink
- ◆ Aluminium alloy material, light, the aluminium alloy fuselage possesses and is able to bear falling, be waterproof, able to bear shaking, dustproof performing.
- ◆ Unify multi-functionally, no matter go out, travel, camp, drive suitable, go out the indispensable necessities at home.
- ◆ The looks, relatively in traditional LED flashlight, the advantage of this patent for invention:
 1. Traditional LED flashlight is the single color, this invention possesses 10 kinds of colors at the same time
 2. Offer many kinds of way of changing color functions, can do for the urgent notice or build such multiuses as the result,etc.
 3. An organic whole of three colors, join and mix all component, the ones that come than traditional LED flashlight are more even .

High power LED full-color flashlight

specification:

Input Voltage	4.5 ~ 4.8V
Input Current	< 500 mA
Power Consumption	< 3 W
LED Lifespan	30,000 hours
Illuminate Angle	± 24 degrees
Mode	◆ Changing Modes: Flash & Fade ◆ Colors: 10 Single colors (white · red · green · blue · orange · light green · purple · yellow · light blue · pink)
Weight	156 g
Dimension	35 x 120 (mm)
Material	Aluminum Alloy
Battery	AAA x 3 (Alkaline battery only)
